1 Listing of Resources

In September 1986, Vancouver City Council adopted the Vancouver Heritage Inventory, which was subsequently adopted as the Vancouver Heritage Register in December 1994. The Heritage Register is a listing of buildings and structures, streetscapes, landscape resources (parks and landscapes, trees, monuments, public works) and archaeological sites which have architectural or historical heritage value. The Heritage Register is a planning tool which provides a valuable record of Vancouver's heritage. In addition, the City has adopted a number of regulations, policies and guidelines which affect buildings or sites listed on the Heritage Register.

Property owners and other developers should consult these regulations, policies and guidelines prior to proposing changes to these properties.

2 Heritage Building Categories

The list of heritage buildings is arranged by address, beginning with numbered avenues, followed by streets in alphabetical order. If a building name is known, it is indicated in the next column. This may be either the current (common) name, or a historical name. The final column headed "Evaluation Group" notes the building's category under the Heritage Register, either an "A", "B" or "C".

These categories are general classifications and are based on any combination of historic, architectural, cultural, spiritual, scientific or social values.

As of **July 20, 2010**, the Heritage Register is made up of the following buildings:

A-listings:	257
B-listings:	1,132
C-listings:	783
	<hr/>
	2,172*

*Excludes those sites in Chinatown (HA-1) and Gastown (HA-2) listed in the Heritage Register document as municipally designated without a Heritage Register classification.

2.1 A - Primary Significance

Represents the best examples of a style or type of building; may be associated with a person or event of significance.

2.2 B - Significant

Represents good examples of a particular style or type, either individually or collectively; may have some documented historical or cultural significance in a neighbourhood.

2.3 C - Contextual or Character

Represents those buildings that contribute to the historic character of an area or streetscape, usually found in groupings of more than one building but may also be of individual importance.

While the category is a useful reference, the key is that whichever category a building is placed under, it has heritage value.

2.4 Heritage Protection and Recognition

In addition, other notations are found on this listing, including those indicating legal protection and other formal recognition.

An "M" or "P" following the building evaluation, indicates buildings or sites that are protected by a legal heritage designation by the City of Vancouver ("M") or the Province of British Columbia ("P"). Some of the municipally designated sites in Chinatown and Gastown may not have an "A", "B" or "C" category. However, they may still have historic value.

An “H” following the building evaluation indicates that the buildings or sites are the subject of a Heritage Revitalization Agreement. A notice of the agreement is registered on title in the Land Title Office. A copy of the agreement is on file in the City Clerk’s Office.

An “T” following the building evaluation indicates that specific interior features and fixtures in the building are protected.

An “L” following the building evaluation indicates that certain landscape features are protected.

An “HC” following the building evaluation indicates that the building, or some portion thereof, is protected by a Heritage Conservation Covenant registered on title at the Land Title Office.

An “F” following the building evaluation or site address indicates that the site is identified by the Federal Government as a National Historic Site. However, it is not legally protected unless it also has municipal or provincial designation, or a Heritage Revitalization Agreement.

3 Heritage Streetscapes

The list of heritage streetscapes is arranged by address, beginning with the numbered avenues, followed by streets in alphabetical order. The second column gives the location of each streetscape a two letter code for the local area that corresponds to the local area map provided. The final column indicates the specifics of the streetscape location on the block.

The streetscapes include blockfaces or groups of buildings which have special heritage merit due to the consistent heritage character of the structures and their setting. While not all the buildings are individually listed on the Vancouver Heritage Register, they contribute significantly to the heritage character of the streetscape or precinct. Streetscapes already in heritage areas have not been included in the list.

4 Landscape Resources

The list of landscape resources is arranged in the order of parks and landscapes, trees, monuments, and public works.

All landscape resources are arranged by location. Avenues are listed before streets and locations with proper names. The second column gives a two letter code for the local area that corresponds to its location on the local area map. The final column notes the name or other specific information about the resource.

An “L” following the building evaluation indicates that a landscape component, or other feature of the property separate from the heritage building is protected. This may include, but is not limited to perimeter walls, fences, pergolas, gates, trees and gardens.

5 Archaeological Sites

Archaeological sites are identified by a Site Number which is a classification system used by archaeologists throughout Canada. The second column notes a two letter code for the local area that corresponds to the location of the archaeological site on the local area map. The final column indicates the type of archaeological site.

In order to protect the archaeological sites, their specific location is not indicated in this Register. However, any development affecting these sites is noted by the City’s Development Services staff during the development/ building permit application process, at which time the Archaeology Branch of the Ministry of Sustainable Resource Management and the applicant are notified.

For those who wish to obtain more information on archaeological sites, the Provincial Government's web site has a section on Frequently Asked Questions.

6 Other Commonly Asked Questions

How Was the Heritage Register Completed? How Are Buildings Evaluated?

A comprehensive architectural survey of the city was completed by a study team that looked at every street in the City to identify notable buildings. This work, together with additional historical research on the buildings, was used to evaluate each building according to the following criteria: (1) architectural significance; (2) historical significance; (3) the extent to which the original context of the building and its surroundings remain; and (4) the degree of alteration to the exterior of the building.

To be included on the Heritage Register, a site is evaluated as outlined above, and in so doing it must be identified as having heritage value and/or heritage character. Heritage value means historical, cultural, aesthetic, scientific or educational worth. Heritage character means the overall effect produced by traits or features which give a property or an area its distinctive quality. There can be different degrees and kinds of value and character. A rare example of a once-common building type may be of considerable value in one neighbourhood over a similar building in another area where that building type is more prevalent.

Can Registered Buildings be Altered or Demolished? Does a Building's "A", "B" or "C" Category Affect How It Is Treated?

A building which is listed on the Heritage Register can be altered on the exterior, and may even be demolished. However, when considering alterations, the way in which the exterior is treated should not depend on whether it is an "A", "B" or "C". In other words, the heritage value of each building on the Heritage Register is formally recognized and the elements that define its character should be afforded the same level of respect.

Before a permit can be issued to demolish a building on the Heritage Register, development and building permits for the new development must first be obtained. City Council may withhold approvals and permits to allow time for heritage retention options to be fully explored with the property owner and with heritage staff. The City's heritage incentives have been successfully used to develop feasible alternatives to the demolition of heritage buildings, to the satisfaction of both the property owner and the City.

Council has instructed that prior to consideration of a proposal that includes demolition of an "A" listed building, a formal independent consultant's report on the physical condition and

economic viability of retaining the building be reviewed by the Director of Planning. The report is at the expense of the applicant. Council reaffirmed this policy on April 18, 1991.

How are Sites Added to the Vancouver Heritage Register?

When the original Heritage Register was adopted in 1986, Council supported a public nomination program whereby sites would be nominated for addition to the Register. Public nominations are reviewed by heritage staff who prepare an evaluation form for the site. The evaluation is then reviewed by the Vancouver Heritage Commission. If the person nominating the building is not the owner, then consultation with the owner must occur to determine whether or not the owner is supportive of the nomination. Sites with sufficient heritage value or character are forwarded to Council for consideration in amending the Register. If approved, the site is added to the Register.

What is a Recent Landmark?

When the Heritage Register was initially conceived it only included buildings that were constructed before 1940. However, the post-war era in Vancouver produced an important collection of buildings with local, regional and national significance noted for their innovative design, technological features and social significance. The Recent Landmarks Program was initiated to identify the most important buildings from this period. Recent Landmark buildings, that are at least 20 years old and meet the same evaluation criteria for Register properties, can be considered for inclusion in the Register. A list of 100 buildings was identified for possible inclusion in the Heritage Register. To date, 22 of these buildings have been added to the Register. Five of these are also protected through designation: the former BC Hydro building, the former Vancouver Public Library, the Gardner House in Southlands, the Dodek House in Oakridge, and the Evergreen Building.

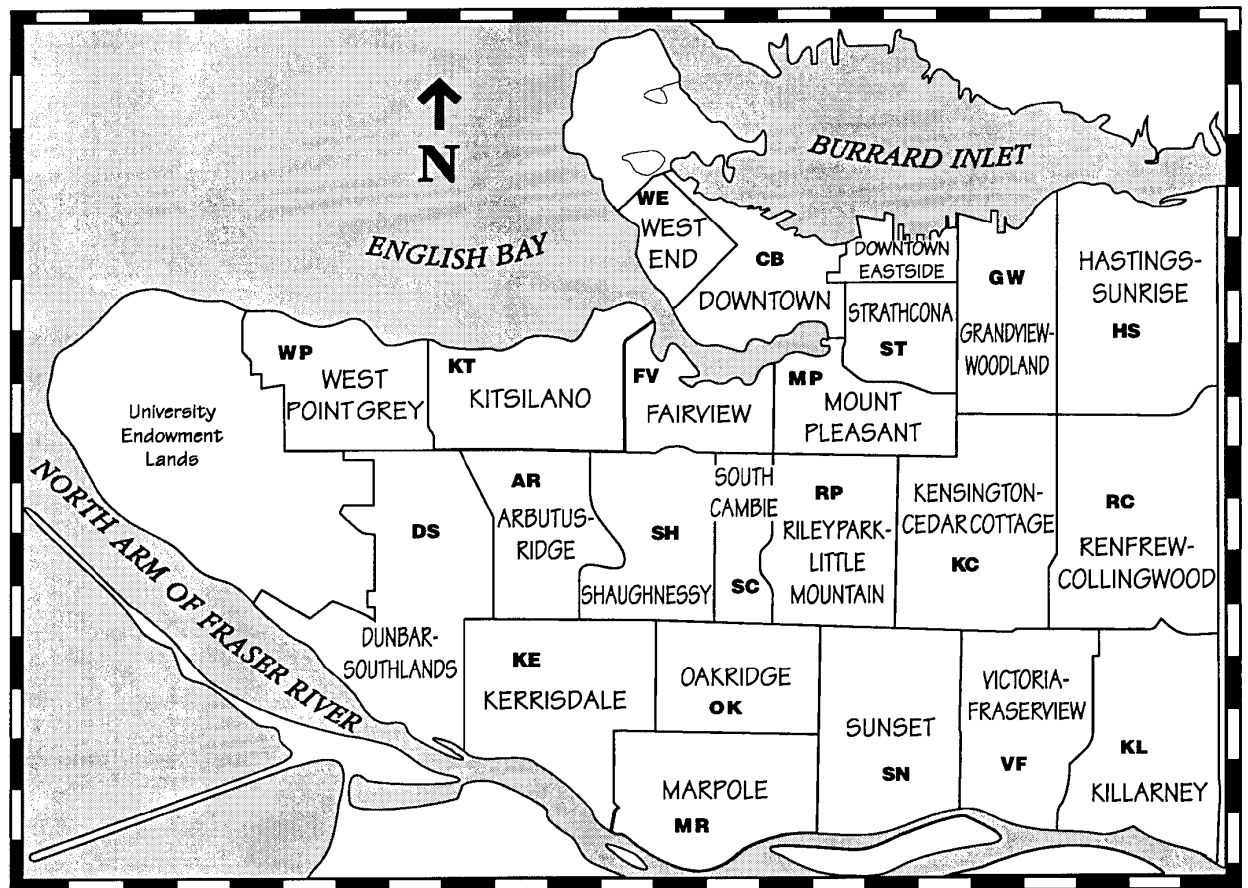

What is the Difference Between "Designation" and the Heritage Register?

Buildings on the Heritage Register are sometimes referred to as "designated". However, the Heritage Register and heritage designation are entirely separate classifications. The Heritage Register is a listing of all resources, while heritage designation is a legal means of heritage protection. Heritage designation allows the City to regulate, by By-law, the demolition, relocation and alteration of heritage property. Interior features can also be protected by designation. Changes to a designated site require a Heritage Alteration Permit, while changes to the exterior of a building on the Heritage Register do not require such a permit.* Designations are noted on the property title; the Heritage Register is not.

*However, if work on a building on the Heritage Register requires a permit (development/building permit, sign permit, etc.) the permit application will be referred to Heritage staff for comments.

Local Areas

The map below shows the boundaries and corresponding abbreviations of the local areas referred to in the Heritage Register.
